

Standard Features

Nominal Flow Rate: 40/65lpm (Refined Petroleum Products) Nominal Flow Rate: 25lpm (LPG) Electro Mechanical Totalizers Preset Function LCD Back Light Display 34mm Electronic Calibration Automatic Temperature compensation ATEX 2014/34/EU MID 2014/32/EU

Optional Features

EMV pay at the Pump Interface with OPT Systems. RFID Transactions On Pump printer Vapor Recovery Stage II Hose Retraction

Combi MPD-8000 Series provides:

- 1. High accuracy Flow Meter
- eliminates loss of product. 2. State of art Electronics
- 3. Robust Construction
- 4. Visual Standards according to customer's needs
- 5. Low total life cycle cost
- 6. Efficient long standing support on genuine Spare Parts
- 7. Fast deliveries
- 8. Extended Warranty

Design features

STATE OF ART PRODUCTION FACILITIES

- Production facility housed in an industrial building of 3500m2. To comply with the up-to-date technological market requirements the production is equipped with state of art equipment such as punching machines [CNC], testing facilities, underground fuel depots and MRP warehouses software.
- Production facility certified according to ATEX 2014/34/EU and MID 2014/32/EU Directives.

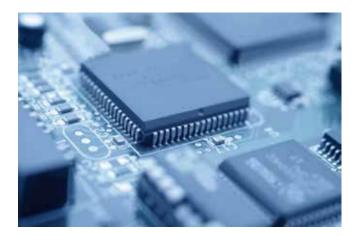

EXTERIOR HOUSING

- Galvanized Steel Metal Panels, powder coating paint for excellent appearance, maximum protection and long life.
- Durable construction in harsh environmental conditions.
- Stainless Steel Metal Panels (optionally)

HYDRAULICS

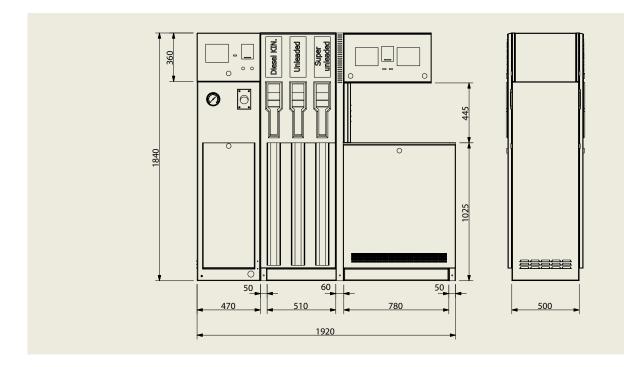

- High quality hydraulic components designed for Easy Installation, Simplicity on Operation and Minimum Maintenance Requirements.
- Flow Meters (Refined Petroleum Products & LPG) and Pumping Unit (Refined Petroleum Products) are certified according to MID 2014/32/EU Directive, ensuring highest accuracy.

ELECTRONICS

- R&D Electronics Dept. manned with certified engineers, offering tailor made solutions.
- Electronics according to latest technology, with password MID Certified.
- Built in diagnostics with error codes indicated in state of the art LCD Backlight Displays.
- IFSF Communication Protocol.

Technical Specs

 RETAIL FUEL DISPENSER ► SUCTION TYPE OR PRESSURE TYPE ► UP TO 8 HOSES & 4 PRODUCTS + 2 NOZZLES LPG

 FLOW RATE: 40 / 65 lpm (Refined Petroleum Products)

 FLOW RATE: 25 lpm (LPG)

Flow Meter

Positive displacement meter, corrosion proof, composed of materials with long-life and long-wear characteristic.

Measuring accuracy within: ±0.2%

Cylinder cover adjustment device provides easy field calibration.

Min. Flow rate: 5 lpm

Max. Flow rate: 90 lpm

Applicable with unleaded gasoline 15%-20% $\rm MTBE$ / Gas Oil / kerosene MID Certification

Suction Pump

Sliding vane type (Optionally Gear Type) Suction head 4 meters. With air eliminator, micro filtration, adjustable by-pass valve and control valve. Min. Flow rate: 5 lpm Max. Flow rate: 90 lpm MID Certification

Electronics

Atmel AVR Risc-Processor Accuracy class: 0.5 Electromagnetic environment class: E1 Automatic Temperature Compensation Self diagnostics MID Certification

Flow Meter

Accuracy: +/-0.6% Inlet thread: 1" BSPP Outlet thread: 3/4" NPT

Differential Valve

Main body: Nodular cast iron O-rings: NBR Membrane: NBR

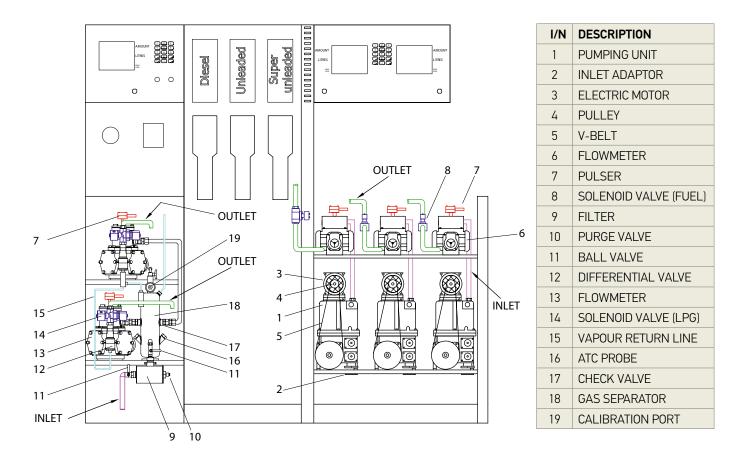

Filter

Inlet thread: 3/4" NPT Outlet thread: 3/4" NPT Filter mesh: 20 microns

Electronics

Atmel AVR Risc-Processor Accuracy class: 0.5 Electromagnetic environment class: E1 Automatic Temperature Compensation Self diagnostics MID Certification
